SOLAR LIGHTING

Since the recent installation of the solar powered LED street lights, we have noticed some situations where extra attention is required primarily due to shade or sunlight blocking. These are Royal Birkdale at Highgate Hill Drive and Royal Birkdale Parkway at Royal Birkdale Drive. The Highgate Hill location appears to be manageable by tree trimming which has been done. The Royal Birkdale Parkway and Royal Birkdale Drive location has a heavy tree canopy and requires relocation. A solution is to erect a new (additional) pole in the median with an additional solar light.

Additionally, to improve lighting at the original gazebo, a new pole and solar light are proposed.

MOTION: **President Earl Bishop proposed that new light poles with solar lights be erected at two locations: 1) in the median at the intersection of Royal Birkdale Drive and Royal Birkdale Parkway; and 2) at the original gazebo on Royal Birkdale Drive. The cost to be paid from Capital Reserves is \$4,659.60.**

Betsy Martello seconded the motion. The motion was unanimously approved, 5-0.
